

Professor Toru Inoue elected as a Fellow of the Mineralogical Society of the America

Professor Toru Inoue of the "Earth and Planetary Systems Science Program, Graduate School of Advanced Science and Engineering", who is the director of the "Hiroshima Institute of Plate Convergence Region Research", has been elected as a fellow of the Mineralogical Society of America (MSA) on October 29, 2021.

The Mineralogical Society of America was founded in 1919, about 100 years ago. MSA is an international academic society in the field of mineral sciences with members around the world, mainly in the United States. The title of Fellow is a researcher with outstanding research achievements in the field of mineral sciences and is awarded to less than 0.5% of the members of the society. Professor Toru Inoue is a pioneer in deep-earth water research. His pioneering research on the formation of hydrous magma using ultra-high pressure and high temperature experimental methods and the elucidation of water and physical properties in mantle transition layer minerals, has made remarkable contribution to the research in the field of internal physical properties of the earth. The selection as the Fellow is a recognition of these achievements.

Dear Professor Inoue:

On behalf of the Council of the Mineralogical Society of America, it is my pleasure to congratulate you on being elected a Fellow of the Society.

Your nomination by the Fellowship Committee and election by Council attests to the high regard that your colleagues have for your scientific activities. You join a distinguished group of individuals who have been recognized for their outstanding contributions to the fields of mineralogy, crystallography, geochemistry, and petrology.

I invite you as a newly elected Fellow to extend your efforts in service to MSA. Service to the Society can take many forms, from active participation on the committees, to submitting papers to the journal, to encouraging colleagues and students to join.

Because of their distinction in science, the advice and suggestions of Fellows are especially important in guiding the Society. Your ideas for improving existing programs, initiating new services, nominating potential honorees, and supporting Society activities will be greatly appreciated.

Sincerely,

Mark Ghiorso
2021 MSA President
